Bent Systems Partners with GlobeRanger to Jointly Leverage EPCglobal RFID Standards

New Standards-Based EPCIS Service Integrates with iMotion RFID Edgware to Enhance Operations for Enterprise, Logistics and Government Customers

Fairfax, Va., and Richardson, Tex. -- April 3, 2007-- Bent Systems, the On-demand, Global Radio Frequency Identification Network & Application Service provider, and GlobeRanger, the leading provider of RFID Edge software, mobility and sensor-based software solutions, today announced a strategic partnership to help customers enhance their operations by utilizing Bent's EPCIS•Savant Network service and GlobeRanger's iMotion Edgware Platform. The companies are co-members of the EPCglobal committee authoring the pending Electronic Product Code Information Services (EPCIS) standards.

The innovative EPCIS•Savant Network collects and distributes data from readers, sensor devices and enterprise information systems and provides an interface for hosted and peered applications. iMotion provides the critical software infrastructure for automation at the edge. Comprehensive and enterprise-grade, iMotion enables quick, flexible implementation and effective operation of edge solutions.

"Many organizations are facing challenges in improving their operations and desire the ability to leverage real-time information," said Sylvanus Bent, CEO and President of Bent Systems. "By integrating edge software from GlobeRanger with our global Internet based information service - EPCIS•Savant - customers can easily take advantage of RFID and sensor information and collaborate throughout their extended organization or with business partners. We chose iMotion because it is flexible, reliable and scaleable and the best of breed in mobility and sensor-based software that complies with the EPCglobal ALE standard."

Bent Systems leverages the Internet to enable any company in the world to take advantage of its products and benefit from the same advanced technology that many large organizations have already begun to adopt. Now, using the EPCIS•Savant service based on the upcoming EPCIS standard, enterprises and government agencies can obtain world-class functionality and achieve returns on their investments more quickly.

"We are pleased to welcome Bent Systems as a partner and look forward to leveraging this new application space. The EPCIS standard will allow a foundation for new visibility solutions in all industries," said Larry Chandler, Vice President of Business Development for GlobeRanger. We look forward to working with Bent Systems to bring our products to their global customer base."

About Bent Systems

Bent Systems helped to write the worldwide standards for RFID, and we are using this insight to develop software to help organizations to track and manage their valuable physical assets using wireless RFID tags. We co-authored the EPCglobal standards (ALE & EPCIS) and companies are using our products to optimize their business processes, reduce costs, increase revenue, and improve customer satisfaction. Our solution EPCIS•Savant Network and Application Service including our SupplyChain•Savant and Asset Management•Savant applications, are next generation solutions based on the project which was awarded "Supply Chain Solution of the Year" - 2003, by Deloitte.
